

# Flextring Hygienic & Discrete

## A new era for tampons

For decades, many women have been complaining about tampons' long withdrawal string. The string, visibly hanging outside your body, gets wet and soiled, picks up bacteria, and makes you feel uncomfortable.

The novel brand features a revolutionary solution: Flextring®. A flexible, **shorter and hygienic** string.

Regular tampon string

**Flextring.** Cleaner, discreet, comfortable

**Flextring** is made of cotton, with a hidden elastic component. It remains **dry and clean**, and is almost **invisible**. When you pull the tampon out of your body, Flextring easily extends to the length of an ordinary tampon cord - enabling an easier grip & pull. Flextring accumulates a **lower level of bacteria** compared to standard tampon strings, making it the right choice for your wellness.
